

Kokomo Private Island launches private hangar at Nadi Airport

Kokomo Private Island has continued to enhance its customer journey from beginning to end with the opening of the first private aviation hangar at Nadi International Airport. Complete with a luxury transfer lounge, the new private hangar offers guests a seamless and exclusive transfer from Fiji mainland to the island. After a year-long build, the 2266m² hangar opened last week.

Designed to further enhance the luxurious travel experience, the \$5-million (FJD) facility interiors replicate that of the island villas. Guests arriving on international flights to Nadi Airport are greeted at the information desk inside the arrivals hall, before being transferred directly to Kokomo's private hangar.

The transfer lounge includes entertainment, seating, a playroom for families, refreshments as well as shower facilities (stocked with luxurious Pure Fiji spa products) for guests to refresh after long-haul flights. On departure, guests will again be able to enjoy the benefits of the luxury lounge while waiting for their connecting flight out of Fiji.
